“ *I had the distinct honor of knowing and working with Glen for many years.*

I learned much from Glen by observing his measured approach to problem solving and, in particular, team-building.

I know Glen was highly respected by his team and colleagues. He was a transformative leader who earned that special place.

Over and over, through many private/relaxed conversations, he expressed his unbridled pride for his children and talked eagerly about his vision for retirement with Tammie, which included buying an RV and traveling around the country.

We are so very saddened that our time with Glen was too short and for the impact to his family. Yet, we are thankful for the time we had together.

-Darryl
