“ I met Vicky almost 9 years ago at work and one of the first things I noticed about her was how hard she worked for our students. She opened the door to education for so many students across valley directly and indirectly. A true champion of serving the most neediest students and always positive with a can do attitude. She made you work harder and reminded you that when there's a will, there's a way. I going to miss her positive attitude and her smile.
